1. INTRODUCTION

International Conference on Geology, Ecology & Landscapes (ICOGEL) will be organized by International Water, Air & Soil Conservation Society held on 10-12 July 2020 at Faculty of Science & Natural Resources, University Malaysia Sabah.

(b) University Malaysia Sabah.

Inaugurated in 2015, ICOGEL is the largest and best attended conference of its kind in the region. An exceptional technical conference with presentations by key academia and industry figures combine to offer exceptional networking, business and educational opportunities to all professionals with an interest for future development in geosciences. This combination of local and international expertise ensures that the programme is highly technical with leading edge science brought together from around the world mixed with local knowledge from the region's leading geoscientists.

ICOGEL extensively covers all aspects on scientific and technical advances in the field of geosciences and geomatics ranging from the integration of instruments, methodologies and technologies to their use in earth sciences, environmental engineering and other natural sciences. The main objective of the conference is to bring together leading Academicians, Scientists, researchers, graduate students from the field of Geosciences, Geological Sciences, Meteorology, Atmospheric Sciences, Global warming, Environmental Sciences, GIS & Remote Sensing and others whose interest is to promote Earth Science education at the school, college and university levels, and among the general public.

Topics of interest for submission include, but are not limited to:

- Biogeography
- Climatology
- Geomorphology
- Hydrology
- Meteorology
- Physical Geography
- Soil Study
- Geology
- Geochemistry
- Mineralogy and Petrology
- Paleontology
- Stratigraphy
- Structural Geology
- Geology Engineering
- Sedimentology
- Geophysics and Geodesy
- Seismic Activity
- Crustal Geology
- Edaphology and Pedology
- Ecology
- Oceanography and Limnology
- Glaciology
- Atmospheric Sciences
- Atmospheric Chemistry
- Atmospheric Physics
- Gravity
- Heat Flow
- Vibrations
- Electromagnetic Waves
- Magnetism
- Radioactivity
- Fluid Dynamics
- Mineral Physics
- Regions of the Earth
- Size and form of the Earth
- Structure of the Interior
- Magnetosphere, Space Probes
- Glaciology
- Engineering Geology
- Atmospheric Physics
- Oceanography
- Environmental Geology
- Climatology
- Mining & Minerals
- Edaphology
- Mining Engineering
- Plate Tectonics
- Volcanology
- Environmental Geology
- Medical geology
- Remote Sensing
- Inventions in GIS
- Photogrammetry
- Image processing and analysis
- Digital Mapping
- Geographical Information systems
- Geodesy sciences
- Spatial Data Analysis
- Heritage recording and mapping
- Application of Geomatics
- Geology and earth sciences
- Soil Mechanics
- Engineering Geology
- Geological exploration
- Soil sciences
- Others areas related to Geology, Earth sciences, Remote Sensing and GIS.
- Environmental Science and Technology
- Environmental dynamics
- Hydrology
- Geophysics
- Atmospheric physics
- Physical oceanography
- Global environmental change and ecosystems management
- Climate and climatic changes
- Global warming Ozone layer depletion
